Basic Linux scripting

AWS Cloud

Basic Python scripting

Docker

SAP

FactSet / Content Analyst

MARCH 2018 - NOVEMBER 2020

Producing error-free client data reports within the time frame. The data is provided by a client that undergoes various FactSet tools which the analyst uses. Key processes the analysts will perform are communication with the client that include ad-hoc tasks related to the key data, daily reconciliation of client data with the use of FactSet Tools while data formatting with the help of MS Excel.

Kodigo Bootcamp / Programmer Trainee

AUGUST 2020 - JANUARY 2021

Learning and creating websites and web applications with the use of basic HTML, CSS, and JavaScript. Also explored other aspects of development like wireframing, creating WordPress Applications, using, and creating RESTful APIs.
